## SKILLS

**Experienced:** C# • C • Java

**Familiar:** SQL • LATEX • Excel • C++ • CSS • HTML • Python

**Libraries/Frameworks:** Selenium • JSwing • WinForms

**Tools/Platforms:** GitHub • Glitch • Bootstrap

## PROJECTS

### cheAPP Market Price Automation /JAVA 2022

This application is made to find the cheapest product at the same markets. You can find the cheapest product by scan or write the barcode of product. cheAPP shows you which market has the cheapest price then you can add it to your basket if you want. You can see your basket, easily delete items or add coupon. This application is written in JAVA and used Selenium for scanning barcode and JSwing for GUI.

### Hospital Appointment Automation /C#, WinForm 2021

It is the automation of the hospital appointment system, where you can easily make an appointment from the selected hospital and browse the appointments. Also in Admin Panel, you can add doctor and announcement, look up appointments and members list, add or delete admins. This project is a WinForm application and written in C#. Used SQL Access for database, CefSharp for GoogleMaps and Bunif Framework for GUI.

### SNT Company Website /HTML&CSS 2020

This project is a hypothetical company website. This hypothetical SNT Company is a fashion company. You can look at their services, corporate, career tabs and if you want to contact them, you can easily contact them from the contact tab. It is responsive and written in HTML and CSS.

### Cinema Automation /C 2020

It is a simple cinema automation where you can buy a ticket from cinema saloon and check your ticket. Also it has an Admin User and this user can add or delete movies. This project is a console application and written in C.

## EDUCATION

### Gazi University

**Bachelor's in Computer Engineering | Sep 2020 - Present**  
C. GPA: 3.13 / 4.0

**Paper:** Cryptography

**Society:** Gazi University Cinema Society - as Social Media Director
